

## **Hassle-Free *Skip A Pay***

### **Help your members go on vacation with Skip A Pay**

Do your clients ever ask if they can skip one month's loan payment? Maybe they want to go on vacation or need to catch up on bills. Whatever their reason, Skip A Pay gives them the opportunity to use money intended for their monthly loan payment on something else for a small fee.

The problem with Skip A Pay is that it takes time for your team to evaluate whether or not Skip A Pay is appropriate at that time for that member. Each request is unique, but members want immediate answers.

### **Automate Skip A Pay**

When a member makes an online request with Skip A Pay, the system automatically evaluates members for their eligibility according to your credit union's set parameters. It then notifies the member if they are eligible. If they are not eligible, Skip A Pay notifies an employee so they can discuss the reasons with the member.

#### **Skip A Pay also does the following:**

- Integrates with the Keystone core
- Requires authentication to validate the request
- Updates the loan payment due date, if applicable
